

ONYX G33

ONYX G33 (MADE IN USA)

The ONYX G33 is a versatile shaft and overachieving design. It is offered as a combination flex shaft to give club makers the ability to tip trim them according to the desired flex rating. The ONYX can be trimmed from ladies flex through stiff flex easily and predictably. The shaft is intended to fit a wide variety of game improvement players regardless of the swing speed. To a club builder, this shaft represents a performance product manufactured to the same strict tolerances we have built our name on for an affordable price.

WOOD

Standard Weight Combination Flex

- Parallel Tip 5.5" -

Flex	Length(in)	Weight(er)	Torque °	Tip Dia.	Butt Dia.	Kickpoint
L/A	46 "	78/gr	3.9°	.335"	.595"	Low
R/S	46 "	83/gr	3.8°	.335"	.600"	Low

IRON

Flex	Length(in)	Weight(er)	Torque °	Tip Dia.	Butt Dia.	Kickpoint
L/A	41 "	80/gr	3.0°	.370"	.595"	Low
R/S	41 "	85/gr	2.8°	.370"	.600"	Low

It's in the Shaft!
