

SL-59

SL-59 (MADE IN USA)

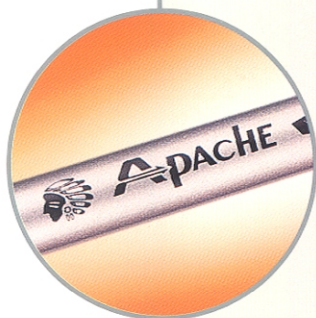

CPM Calibrated High Modulus
Light Weight Graphite

- Parallel Tip 4.5" -

Best described as a luxury performance shaft, the SL-59 is a picture perfect replacement for original equipment shaft commonly installed in off the rack clubs today. This shaft has gone through a ground up redesign to further improve the performance and feel of the already excellent SL59. This shaft has a smooth, soft feeling and provides excellent bottom end kick through the impact zone. It promotes a higher trajectory off the tee and very forgiving demeanor.

WOOD

Flex	Length(in)	Weight(er)	Torque '1	Tip Dia.	Butt Dia.	Kickpoint
L	45 "	59/gr	3.8°	.335"	.580"	Low
A	46 "	60/gr	3.7°	.335"	.590"	Low
R	46 "	61/gr	3.7°	.335"	.595"	Low
S	46 "	63/gr	3.6°	.335"	.600"	Low
X	46 "	65/gr	3.6°	.335"	.600"	Low

It's in the Shaft!
